Inflation Instructions for Sports Balls

It is **essential** to follow the following steps when inflating your sports balls. Please read through all steps and watch the linked video prior to starting.

1. Use a straight, smooth needle.

2. Moisten the needle with water or glycerin.

3. Align the needle over the valve opening at 90°.
Do NOT insert the needle at any other angle

4. Gently and slowly insert the needle into the valve.
Be careful not to push the needle too far in.

5. Inflate the ball to the required pressure slowly
and remove the needle straight out of the valve.

6. Do not over inflate

****Important Notes:**
1. No credits or replacements
will be sent if inserted incorrectly especially if the valve slips
2. Valve displacement is difficult to fix and may void warranty
3. Deisgned for light recreational use. Impropr inflation may affect durability.
