

INFLATION INSTRUCTIONS

For Large Sport Balls

It is essential to follow the following steps when inflating:

1. Use a straight, smooth needle.
2. Moisten the needle.
3. Align the needle over the valve opening at 90°.
Do not insert the needle at any other angle.
4. Gently and slowly insert the needle into the valve.
Be careful not push the needle too far in.
5. Inflate the ball to the required pressure and slowly remove the needle straight out of the valve.

INSERT NEEDLE AT 90°
